

## Center for Fault-Tolerant Computing Testing Service

### Measurable business value

•	Improve the architecture of your availability solutions
•	Reduce business risk
•	Quickly resolve problems
•	Lower your lifecycle costs

### Key deliverables

- Access to availability specialists and a range of professional and managed services that track the lifecycle of your mission-critical application solutions
- Leverage Stratus testing facilities

### State-of-the-art availability testing

The Stratus Center for Fault-Tolerant Computing is a comprehensive testing and evaluation center designed to simulate a real-world computing environment. It is equipped with Stratus® ftServer® and Continuum® servers and products from other manufacturers, including storage (EMC) and peripheral devices. This facility offers internal Gigabit Ethernet support as well as Fibre Channel connectivity between systems and devices. The resources of the center can be partitioned, allowing several customers to simultaneously replicate and test their own system configurations and application environments.

As your availability business partner, Stratus Technologies supplies the know-how and commitment your availability solutions demand. At the center, you benefit from technical pros with years of field experience in helping companies to:

- Reduce IT complexity
- Solve business problems
- Save money while achieving enterprise goals

### Complete range of services

Among the valuable capabilities offered at the Center for Fault-Tolerant Computing are:

- **Assessment Services** — Stratus will evaluate, improve and optimize the architecture of sophisticated availability and business continuity solutions
- **Recommendation Services** — Stratus will plan and perform application stress tests, capacity-planning simulations, and run performance-tuning benchmarks assure your solution will support the required levels of availability, reliability, security, scalability and performance
- **Implementation Services** — Stratus will stage, integrate and deploy a unique combination of products and services in accordance with the design – without compromising end-to-end solution availability or performance
- **Sustaining Services** — Stratus will proactively manage the health and vital signs of the solution to prevent business disruptions, improve service quality and reduce operating costs

The Center for Fault-Tolerant Computing is located at Stratus' U.S. offices:

Stratus Technologies  
111 Powdermill Rd.  
Maynard, MA 01754-3409  
978-461-7000

### **Why choose Stratus?**

Stratus is a market leader in the development of fault-tolerant hardware, failsafe system software and tightly integrated availability support services. Since 1980, Stratus servers have powered many of the world's most mission-critical applications. We understand how to keep business-critical availability high and costs low. Call on our global team of availability specialists to discover how the resources of the Center for Fault-Tolerant Computing can provide measurable business value.
